## EDUCATION

### Carnegie Mellon University

B.S. Mechanical Engineering, Incoming Freshman

Expected May 2030

### Great Valley High School

Senior · Malvern, PA · GPA 4.0 / 4.0

2022 – 2026

Relevant coursework: AP Physics C (Mechanics, E&M), AP Calculus BC, AP CSA

## EXPERIENCE

### Independent Engineering Research

Carnegie Mellon University

2026 – Present

- Designing and prototyping a custom cycloidal drive, studying reduction mechanisms, load paths, backlash, and precision manufacturing.
- Pending formal-mentorship requests with several Robotics Institute (RI) faculty.

### Founder & CEO

Formula Theory & Automotive Design (FTAD) · 501(c)(3) Nonprofit

2024 – Present

- Founded an F1-inspired robotics competition nonprofit, securing \$65,000+ in funding through targeted sponsorships and grant acquisition.
- Conducted extensive market research and obtained international product validation, establishing FTAD's competition framework across multiple countries.
- Engineered competition vehicle designs in Onshape and Fusion 360, applying CFD simulation and topology optimization to maximize aerodynamic and structural performance.

### MechE Intern, UGV Defense Company

Raptor Defense Company

Summer 2026

- Led SCORPION, an expendable payload vehicle, as lead and sole mechanical engineer, owning the full mechanical design from concept to working prototype.
- Designed the complete assembly in Onshape in 6 days, then manufactured and assembled it in 3.
- Delivered on spec: exceeded 50 mph (conservative estimate), used under 50% of the R&D budget, and passed the preliminary test matrix.
- Built a Portable Control Unit for the electronics team in SolidWorks.

### Design Lead & CAD Specialist

VEX Robotics · World-Qualified Competitive Team

2024 – 2026

- Led all mechanical design and CAD work on a team that qualified for the VEX World Championship in the 2024 season.

## LEADERSHIP & ACTIVITIES

### Co-Founder

NextGen Business & Law Forum · 501(c)(3) Nonprofit

2022 – 2024

- Organized entrepreneurship competitions for 500+ students across the United States.
- Oversaw event logistics, curriculum development, and partner outreach.

### Future Business Leaders of America (FBLA)

Web Development · National Qualifier · 4th in Pennsylvania

2025

- Learned web-dev logic in 4 months and built the competition project in a team of 3.

### Competitive Boxer

USA Boxing

2023 – Present

- Two-time PA State Champion (2024 & 2025).
- Volunteer boxing coach, mentoring athletes ages 12–34 in technique, discipline, and sportsmanship.

## SKILLS

**CAD & Design:** Onshape, Fusion 360, SolidWorks, CFD Simulation, Topology Optimization

**Programming:** Python, Java, C++

**Engineering:** Kinematic Systems, Structural Analysis, Aerodynamic Simulation, Rapid Prototyping, UGV Systems

## INTERESTS

Kinematics engineering, automotive engineering & racing technology, unmanned systems, defense technology, entrepreneurship, and combat sports.
